

Seyed Mehdi Saleh

Game Developer

saleh.mehdi1381@gmail.com

(+98)9157774130

Mashhad, Razavi Khorasan, Iran

Profile Summary

Game developer with hands-on experience developing games with Unity and Godot, and building software projects with C++ and SDL3. Experienced in developing mobile games, implementing software-to-hardware communication, and designing game mechanics. Placed second in two university game jams and gained experience collaborating on teams and developing independent projects. Interested in solving technical problems and developing reliable, optimized systems for games.
